MUNICIPALITY

eNewsLetter

issue 5 . February . 2017

*“Kamarhati town is now
being developed into a
Greencity”*

Chairman's Desk

*"The rapid ongoing urbanization has started to reveal its negative impacts in our municipality. Vacant lands are being built upon wherever available resulting in the increase of hard surface all across the municipality. Looking at this scenario the municipality has decided to reserve specific open spaces as no built area which are to be developed strictly as parks. There are innumerable benefits of open green spaces. Most significant would be its contribution of purifying surrounding polluted air and as well supplying sufficient oxygen. Then the presence of trees and dense foliage reduce temperature around the local area and helps to deal with heat islands that has become a major issue of current urban settlements. It also helps to trap moisture and heat resulting in cooling of the place. Open spaces acts as a place of community gathering and increase social cohesion among residents, while the children of the locality get the opportunity of playing outside from their home. Thus the list could be endless if all the benefits of open space are understood properly. Taking into account the importance of green spaces the municipality is undertaking a project called the **Greencity** for implementing in our municipality. The DPR has already been completed and once funding is available we would start the project in due course of time.*

The municipality would also like to reiterate to all concerned parties to stop manufacturing of carry-bags/plastic films, which is less than 50 micron; else the facility will be shut down. Violation of this would be strictly addressed with appropriate financial and other punitive action"

Swachh Bharat and Nirmal Bangla mission

After the Kamarhati Municipality successfully contributed towards the declaration of Open Defecation Free (ODF) district of North 24 Parganas, the municipality is keeping a strict vigil to ensure that the toilets built are being used by the beneficiaries. Accordingly information has been communicated to the respective ward representatives to report instances of open defecation even after the presence of new latrines that were constructed under the Nirmal Bangla scheme.

Habitual offenders will be strongly reprimanded. Although it is a fact that several beneficiaries had to cancel their allocation of the latrine due to unavailability of space, since majority of the toilet less household was located in densely built slums, and also in areas where there was very not much vacant space left. Keeping in view of this scenario the municipality will start a new project of community latrine especially for the EWS and slum dwellers, where sufficient space is not available for the individual latrine model. In case of the community latrine project suitable location will be identified nearby to slums and other similar areas which could be accessed easily. Once the project details along with fund share are finalized municipality residents will be informed in due course of time.

আমাদের নির্মল উত্তর ২৪ পরগনার শপথ

আজ আমরা সকলে শপথ নিচ্ছি

- আমরা নিজেদের পরিচ্ছন্ন রাখবো
- আমাদের চারপাশকে পরিচ্ছন্ন রাখবো
- যেখানে সেখানে নোংরা ফেলবো না; অন্যকে ফেলতে দেবো না
- কখনোই খোলা জায়গায় মলত্যাগ করবো না; অন্যকে করতে দেবো না
- খাওয়ার আগে, শৌচকার্য করার পরে, শিশুকে খাওয়ানোর আগে, শিশুর মল পরিষ্কার করার পরে সাবান দিয়ে হাত ধোবো
- খাবার জল স্বাস্থ্যসম্মতভাবে সংগ্রহ, সংরক্ষণ ও পরিবেশন করবো

আমাদের পরিচ্ছন্নতা আমাদের দায়িত্ব। আমাদের জেলার পরিচ্ছন্নতাও আমাদের দায়িত্ব। আমরা আজ থেকে এই দায়িত্ব পালনে দায়বদ্ধ থাকলাম।

আমাদের সকলের সম্মিলিত প্রচেষ্টায় আমাদের জেলা ও সমগ্র পশ্চিমবঙ্গ নির্মল হবে।

Green City Project

This is a mission project which is entirely funded by the state government itself with the aim of increasing greening of the city and as well to restore the water bodies of the city along with their beautification. This project will also address the issue of ***“Safe Drive Save Life”*** by constructing footpath along selected busy roads thus segregating pedestrians from vehicular traffic and hence reducing conflicts and accidents while making for more space for the vehicles to ply through smoothly and relieve congestion.

Green City Project

Another interesting component of this project would be to create wifi zones across the entire municipality in selected zones that will be identified in due course of time. This would be part of the state government ambition of encouraging e-governance activities and as well increase penetration of digital literacy among the residents of the municipality.

LED Light Post : A component of Green City

Green City Project

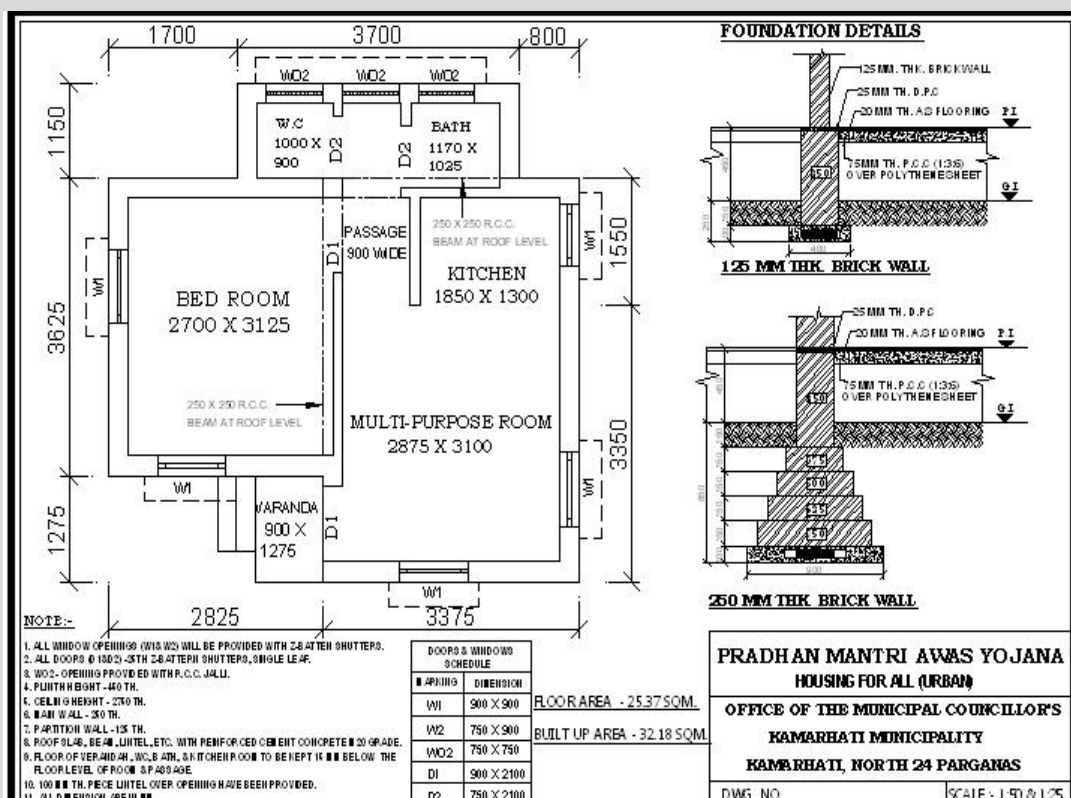

Kamarhati municipality being located at the northern periphery of Kolkata is an significant entry points for millions of migrants from surrounding urban and suburban areas. This gives rise to major security concerns for the local and state authorities. Hence to monitor effectively CCTV cameras will be installed at strategic junctions of major roads passing through the municipality, and also in other areas with presence of important municipal assets and vital infrastructures.

Pradhan Mantri Awas Yojna

(HFA)

Another important project initiated during the last quarter was the Housing for all mission also known as the Pradhanmantri Aawas Yojana, with the aim of providing permanent houses to the needy, who cannot afford a proper roof over their head. During the initial phase a total of 300 houses are to be built for the residents of municipality, selected strictly according to the criteria which makes them eligible.

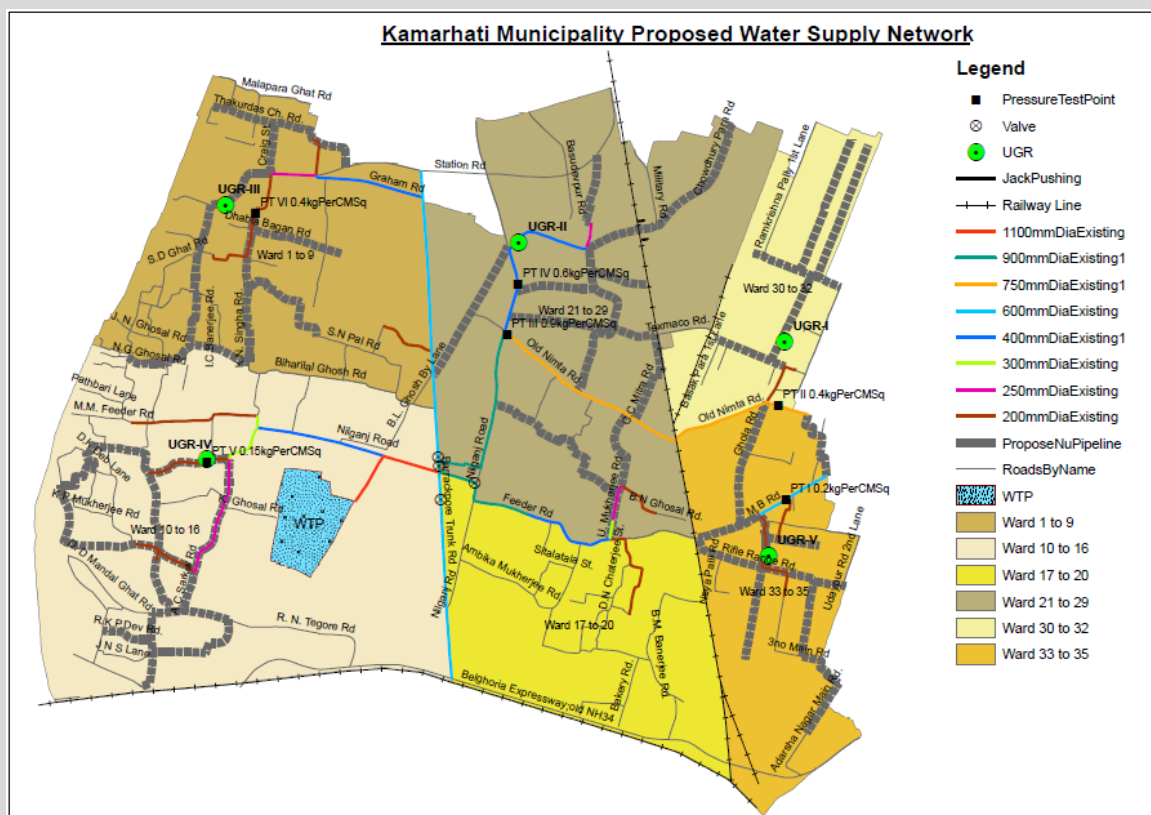

This project is ongoing and the first instalment has been released for 261 beneficiaries out of total of 430 which was scheduled for the financial year of 2015-16. Out of these almost 50% of the beneficiaries has exhausted their received funds, and demanding the second instalment. The municipality is ready to disburse the second instalment as per guidelines after sanction is received from MED.

- বাড়ীর ক্ষেত্রফল= ৩২.১৮ বর্গ.মি.
- বাড়ীর উচ্চতা= ২.৮৫০ মি.
- ভীতের মাটিকাটার গভীরতা= ০.৯ মি.
- ঢালাই এর ভাগঃ
- ১.রাফ ঢালাই= ১সিমেন্টঃ৩বালিঃ৬পাথর
- ২.ছাদ,কলাম ঢালাই=
১সিমেন্টঃ১.৫বালিঃ৩পাথর.
- ৩. ইটের গাথনি = ১সিমেন্টঃ৬বালিঃ
- বাইরের দেওয়াল= ০.২৫০ মি.
- ভিতরের দেওয়াল = ০.১২৫ মি.

Water Supply

This is one of the main focus of the municipality to upgrade the existing water supply network of the municipality along with laying of new pipelines. The aim is to reduce dependence from ground water extraction to surface water. This is a AMRUT project being funded by the Government of India and state government. The first instalment of fund has already been allocated to the municipality and the preparation of DPR has already started by KMDA. Once the DPR is finalized it will go for submission to the government of India for approval. After completion of the required procedure work is expected to start after the Durga Puja.

Plastic Prohibition

Efforts are ongoing to implement the new policy of prohibiting plastic less than 50 micron, hence the -----“**municipality would like to request all concerned parties to stop manufacturing of carry-bags/plastic films, which is less than 50 micron; else the facility will be shut down. Violation of this would be strictly addressed with appropriate financial and other punitive action.**”----- Word for the Public
