Dear Sir,

Sub: Contamination of water supply with sand and other dust particles (Holding No: 293)

This is to bring to your kind attention the fact of contamination of water supply with sand and other dust particles (Holding No: 293) for last 15 days. We thought that the matter is of temporary nature and would subside on its own. But when it is continuing, we are bringing it to your kind attention for immediate remedy. Water is vital and any type of impurity may have catastrophic consequences effecting the whole locality. I and my sister-in-law are aged with limited mobility and our daughters are working making it difficult for them to visit in person on week days. We are ready to deposit the fee required inspection and other services required to restore the clean water supply.

Thanking you in anticipation.

Yours faithfully,

Smt Debala Banerjee
